

THE OFFICIAL SNOWMOBILE TRAIL REPORT

From the Desk of: Gary Marquis | Caribou Parks & Recreation Dept. | 55 Bennett Drive

3-25-22

As I type this report the Central and Northern part of the County are currently in a Winter Weather Advisory with 6 plus inches predicted today. The temperature is hovering around 31 degrees which is making the snow quite sticky. Most clubs will be out once the storm is over and will do what they can tonight.

Trails are overall in good condition, and they get better as you travel further North. The temperatures this weekend will make for quickly softening trails so please keep this in mind. This is the time of the year to travel the less traveled trails in the County which are the green trails on the map. They are groomed wide and smooth just with a lot less traffic.

Please use caution in field as the water is starting to collect in the low spots and with this new snow it might be covered so caution is advised. Please be respectful of some trails are closed.

The section of 76 in Presque Isle going toward Chapman is closed due to water. Caribou has a section of 83/90 near the railbed has water in the diversion ditch, sledders are going around it with no issues.

MOOSE MOOSE AND MORE MOOSE they are everywhere so please when you see the tracks on the trails, pay attention as they are close by.

The Deer and Moose are really liking the white carpet that all clubs are laying down, so if you see tracks on the trail this means they are out on them, so please use caution. Lots of deer in the
